

Enhancing Security at Our Lady of Grace with Pavion's Cloud-Based Security Solutions

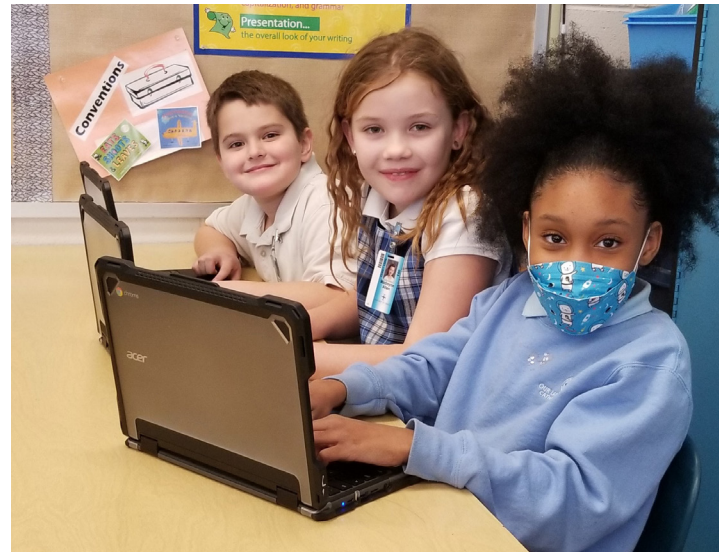

Challenge

Our Lady of Grace, a leading K-12 educational institution, sought a reliable and comprehensive security solution to protect its students, staff, and facilities. The school's main priorities were to enhance surveillance, streamline security operations, and ensure rapid incident response. The school faced multiple security challenges:

- **Outdated Surveillance Systems:** The school's existing security infrastructure was outdated and lacked real-time monitoring capabilities.
- **Limited Visibility:** With multiple buildings and expansive outdoor areas, ensuring adequate coverage across the campus was a challenge.
- **Fragmented Security Systems:** The school had different systems for access control, surveillance, and emergency communication, making it difficult to manage security holistically.

Overview

- Enhanced Surveillance and Safety with Cloud-Based Systems
- Unified Management of Security Functions Efficiently
- Integrated Remote Access Security Allowing for Rapid Response to Incidents
- Reduced Operational Costs and Need for On-Site Security
- Provided Peace of Mind with the Pavion Experience

Solutions

By partnering with Pavion to implement a state-of-the-art cloud security solution, the school was able to meet its security objectives while benefiting from the scalability and user-friendliness of the new innovative cloud security system. School principal, Mandy Kirk, stated “The system’s ease of use, combined with its powerful features, has really stood out. Our staff no longer needs to carry keys everywhere—they can simply use their phones to access doors. It’s secure, reliable, and gives us confidence in keeping everyone safe.” Pavion provided a number of comprehensive cloud solutions.

Cloud-Based Cameras

The school deployed Pavion’s cloud-managed security cameras across the campus, providing high-definition video feeds and real-time

monitoring. These cameras are equipped with motion detection, night vision, and 24/7 recording capabilities, ensuring continuous coverage.

Centralized Security Management

With Pavion's cloud-based platform, the school was able to manage all security functions from a single, user-friendly dashboard. This eliminated the need for separate systems and allowed security personnel to easily monitor live video, review footage, and respond to incidents from any location.

Remote Access

School's administrators can monitor security remotely, offering peace of mind and ensuring rapid response to incidents through a mobile app.

Scalable Infrastructure

Pavion's solution provided scalability, allowing the school to easily add new cameras or expand its security coverage as its needs evolve.

The system's ease of use, combined with its powerful features, has really stood out. Our staff no longer needs to carry keys everywhere—they can simply use their phones to access doors. It's secure, reliable, and gives us confidence in keeping everyone safe.

Results

Enhanced Surveillance and Safety

With the cloud video systems' high-definition cameras and real-time monitoring, the school significantly improved its ability to detect and deter suspicious activity. The increased visibility ensured a safer environment for students and staff.

Streamlined Security Operations

The integrated platform enabled the school to manage surveillance and access control efficiently, reducing the time spent on administrative tasks and improving overall security operations.

Faster Response Times

With instant access to live footage and alerts, security personnel were able to respond to incidents more quickly, preventing potential security breaches.

Cost-Effective Solution

By consolidating multiple security functions into a single platform, the school was able to reduce operational costs and minimize the need for on-site security personnel.

Conclusion

Pavion's cloud-based security solution transformed Our Lady of Grace's security infrastructure, providing them with a modern, scalable, and easy-to-use system. The enhanced surveillance, centralized management, and real-time monitoring have helped the school maintain a safe and secure environment for its community, demonstrating the value of investing in a comprehensive cloud-based security solution. "Having the ability to view cameras and manage door access on one platform has simplified everything for us. We can now control access and view footage remotely—whether we're at school or off-campus." – Mandy Kirk, Our Lady of Grace school principal.

PAVION EXPERIENCE

We've Got You Covered

We call it the Pavion Experience. The lifecycle of services we deliver, from design through ongoing support, that helps keep your fire, security, and integration systems running while saving you time and money.

Pavion brings best-in-class solutions together. Through the entire project lifecycle, we work with our customers to solve their problems and help them overcome their challenges. So no matter your project, we meet your needs with a partner you can trust.

Design

From the initial project kickoff to understanding your requirements, we'll design a solution that meets your needs with clear scope, bill of materials and comprehensive drawings.

Technology & Integration

Once your design is approved, we deliver your technology with first-class implementation, engineering, change management and training.

Service

With your solution fully implemented, Pavion offers multiple service offerings to make sure you get the most out of your Pavion Experience, with the highest level of reliability and customer service offered.

About Pavion

Pavion connects and protects by providing Fire, Security, and Integration solutions to customers in 70+ U.S. locations and 23 countries. The company brings industry-leading experience to clients in the enterprise, healthcare, education, government, data center and retail industries. Its mission is to bring clarity and transformation to safety, security, and communication through technology and radical service. Learn more at [Pavion.com](https://pavion.com).

Our Industries

We've built solutions for many different industries, and we're ready to provide you with the service and solutions you need to connect and protect what's important.
