PAVION™
CONNECT AND PROTECT
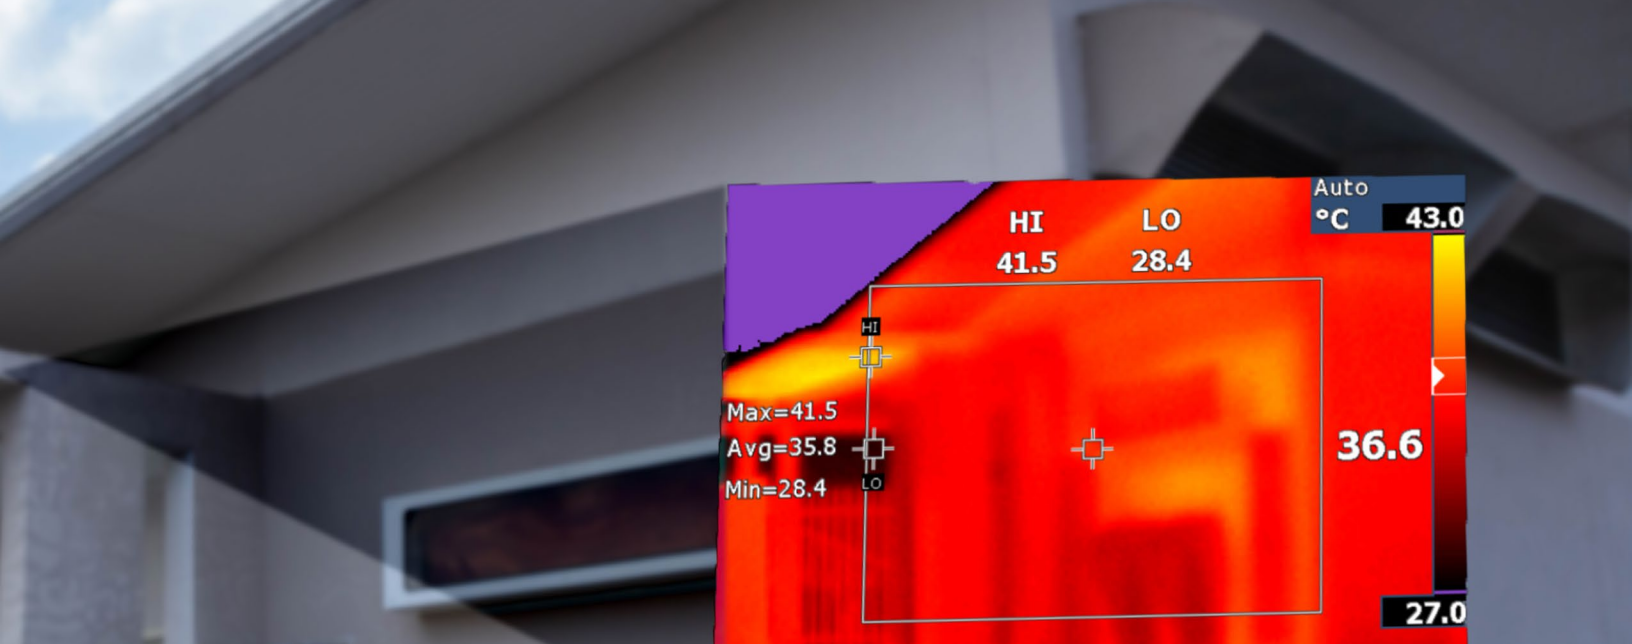

Pavion's Thermal Imaging Security Solution

Enhanced Security with Thermal Imaging Systems

In an ever-evolving security environment, detecting potential threats before they escalate is critical. Pavion's Thermal Imaging Security Solutions provide advanced monitoring capabilities that work in complete darkness and through challenging environmental conditions, such as smoke, fog, or low light. These systems use heat signatures to identify people, vehicles, and potential threats, offering a proactive layer of defense for your property.

Enhanced Detection in Low Visibility:
Thermal imaging detects heat signatures, making it ideal for monitoring in darkness, smoke, or fog—conditions where traditional cameras might fail.

Proactive Threat Identification:
Detect and monitor potential threats before they reach critical areas, reducing the chances of security breaches.

Reduced Risk of Unauthorized Access:
With thermal imaging, intruders or unauthorized individuals can be identified even if they attempt to hide in low visibility conditions.

### Integration with Existing Security Systems:
Easily integrates with your existing surveillance infrastructure, such as video monitoring or access control systems, to provide a more comprehensive security solution.

Reduced Operational Costs:
By automating surveillance and reducing the need for constant human monitoring, thermal imaging systems help reduce operational costs.

Long-Term Cost Efficiency:
The durability and reliability of thermal cameras lead to fewer maintenance costs and longer service lifespans, providing a strong ROI over time.

Key Features

Pavion's Thermal Imaging systems offer cutting-edge technology to enhance security with heat-based detection:

Long-Range Detection: Our thermal cameras are capable of detecting human activity at extended distances, even in low-light or complete darkness.

AI-Enhanced Analytics: Pavion's thermal imaging systems leverage AI to analyze and interpret the thermal data, automatically identifying and flagging potential threats, and reducing false alarms.

360-Degree Coverage: Equipped with pan-and-tilt capabilities, our systems ensure comprehensive monitoring, covering wide areas and providing better situational awareness.

Integrated Video Surveillance: Thermal cameras seamlessly integrate with your existing video surveillance systems for continuous visual verification and threat assessment.

Environmental Adaptability: Our thermal imaging solutions are built to withstand extreme weather conditions and work efficiently in environments where traditional cameras struggle, such as fog, rain, or snow.

Industries We Serve

Pavion's Thermal Imaging solutions are designed for industries where security, surveillance, and threat detection are critical:

Energy & Utilities: Monitor large facilities like power plants and substations, detecting potential security threats or equipment failures before they escalate.

Transportation & Infrastructure: Ensure the safety of critical transportation infrastructure such as airports, railways, and highways by detecting unauthorized access or suspicious activity.
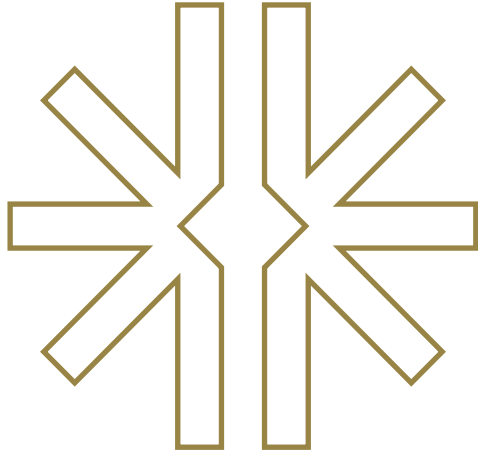

Government & Defense: Thermal imaging offers a reliable solution for protecting sensitive government buildings, military installations, and border security areas.

Industrial & Manufacturing: Protect high-value assets in warehouses, factories, and storage facilities by monitoring for intruders or hazardous conditions.

Education: Enhance campus security by detecting potential threats in remote or poorly lit areas on educational properties.

Healthcare: Protect critical healthcare facilities, including hospitals and pharmaceutical storage, where security risks may involve unauthorized access or tampering.

Why Choose Pavion 's Thermal Imaging Solutions?

Superior Detection in Any Condition: Pavion's thermal imaging systems excel in challenging environments, ensuring security even in total darkness or low-visibility conditions.

Scalability & Flexibility: Our systems can be tailored to meet the specific needs of your facility, whether you need long-range detection for large properties or focused coverage for high-risk areas.

Seamless Integration: Thermal cameras integrate with your existing security infrastructure to create a comprehensive, unified surveillance network.

AI-Powered Accuracy: Leverage AI-driven analytics that reduce false alarms and improve the accuracy of threat identification, making your security system smarter and more efficient.

Built to Last: Pavion's thermal cameras are durable and weather-resistant, designed for long-term performance with minimal maintenance.

Get Started

Secure your facility with Pavion's Thermal Imaging Security Solutions. Contact us today to discuss your specific needs and find out how our advanced thermal cameras can provide superior detection and peace of mind.

Why Pavion?

Pavion goes beyond simply providing security systems—we build partnerships. Our team works closely with you to design, implement, and support thermal imaging solutions tailored to your unique needs.
Our commitment to excellence includes:

Technology Innovation: Stay ahead of emerging threats with AI-driven analytics and regular system updates.

24/7 Expert Support: We provide round-the-clock support to ensure your thermal imaging system operates at peak performance.

Compliance & Peace of Mind: Trust our expertise to navigate regulatory requirements and ensure your security system meets industry standards.

At Pavion, we're dedicated to protecting your people, property, and critical assets.

About Pavion

Pavion provides leading-edge Fire, Security, and Integration solutions across more than 70 U.S. locations and 23 countries. We specialize in a variety of industries, bringing unparalleled expertise and service to protect your assets.

Learn more at Pavion.com.

Our Industries

We've built solutions for many different industries, and we're ready to provide you with the service and solutions you need to Connect and Protect what's important.

Destination Retail
Energy & Utilities
Transportation & Infrastructure
Government & Defense
Healthcare & Pharmaceutical
Education
Industrial & Manufacturing
Technology & Data Centers

At Pavion, our mission is to transform security through technology and radical service, ensuring clarity and safety across all industries.
